

H.Chair

H.Chair is a comfortable and wrap-around chair consisting of a light tubular structure in chromed metal, on which lays a synthetic core. In the front part, the metallic structure supports a semi armrest, designed to contain the body and to help to get up, while in the rear part it remains visible, configuring an original sign resembling a belt. The functionality and comfort of the continuous design of the body, a soft curved shell that faithfully follows the human profile, make this project suitable for different uses, from a dining chair to a small easy chair for the living area. Available in leather and eco-leather in all colours of our collection.
