

LIA chair

In 1999, continuing a now consolidated research on the leading topic of chairs with an aluminium frame, Zanotta presented the chair Lia that proved to be innovative due to the increasingly advanced use of die-casting: the chair side is made of one single element in aluminium alloy which holds the front and back legs and the chair back. Aluminum alloy frame, polished or painted black, graphite or white. Seat, back and armrests upholstered in polyurethane. Removable cover in fabric or leather or non-removable in cowhide. Upon request two loose covers to be put on without fixing can be supplied: in 100% white cotton, available either short covering seat and backrest or long covering legs too; or in fabric Canneto, 100% linen, available long only.

Brand: **Zanotta, Made in Italy**

Item type: Chair

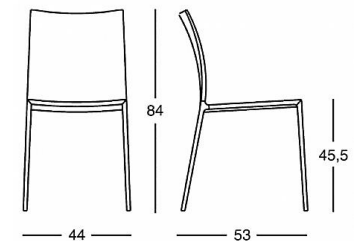

Item Code: V2086/GRAF/27028

Designer: Roberto Barbieri

Frame Color: Graphite

Cover: Quadrifoglio

Dimension: 44 x 53 x 45.5/84cm
